

Post some feedback in another user's name.

User1

User2

I'm User1 and can i post feedback as User2 in the portal

[user1@test.com](mailto:user1@test.com)

user1123

[user2@test.com](mailto:user2@test.com)

user21234

Server side code is not validating the user2 is permitted to add the feedback comments with User1 authorization token

Ecommerce

A rouge attacker can create an account and he can do login

And he can perform broken access controls

Can attacker also forge the logs in the server by changing the userid

=====

User 1 wanted to view the User 2 Basket information

[user1@test.com](mailto:user1@test.com)

user1123

[user2@test.com](mailto:user2@test.com)

User21234

Basket ID should unique and random to not able to predict

Application code should validate the User associated with token reference to Basket id

=====

Can user attempt to change password for other user ?

Can user performing a fundtransfer can able to perform fundtransfer to useraccounts which are not allowed ?
